

**Dr Jonathan Berg MB ChB, MSc, MD, FRCP Edin.**

**Chair of the Exam Committee for the ECMGG**

I have been a consultant in Clinical Genetics, and Senior Lecturer at the University of Dundee since 2004. My position combines Clinical Genetics with teaching and research. I am also the lead Clinician for Research into Rare and Genetic disease in Scotland.

My previous experience in setting exams includes undergraduate exams for the University of Dundee, and working as a member of the question writing group for The Royal Colleges of Physicians in the UK. Since 2015 I have been a member of the committee for the UK specialty exam in Clinical Genetics.

I am a founder member of the exam setting group for the UEMS Section of Medical Genetics Exam and I have helped design and run the exams for the ECMGG in 2018 and 2019. In 2018, I was appointed as one of the two UK representatives to the UEMS section.

As committee chair, I enjoy working with the large and effective group of European question writers that we have built up over the last few years and together we aim to deliver a fair and effective exam that will support the development of Clinical Genetics as a Clinical Specialty across Europe.
